

Lab 13 Part E

OpenAI

The screenshot displays a REST client interface for the URL `https://api.openai.com/v1/responses`. The request is a POST method with the following JSON body:

```
1 {
2   "model": "gpt-4o",
3   "temperature": 2,
4   "input": [
5     {
6       "role": "user",
7       "content": "Please give me a name for a travel Instagram page."
8     }
9   ]
10 }
```

The response is a 200 OK status with a JSON body:

```
10 {
11   "max_output_tokens": null,
12   "max_tool_calls": null,
13   "model": "gpt-4o-2024-08-06",
14   "output": [
15     {
16       "id": "msg_6893fb55d9d481a1b16d77d13a5615270fa649b8a5818edf",
17       "type": "message",
18       "status": "completed",
19       "content": [
20         {
21           "type": "output_text",
22           "annotations": [],
23           "logprobs": [],
24           "text": "**Wonderreuses Globe**"
25         }
26       ],
27       "role": "assistant"
28     }
29   ]
30 }
```
